7. These Bento boxes need following modifications:
- Curvy fonts are not much visible plus few words like Greece are difficult to read due to current font type. Also, details like “BHMS - Panjab University” & “Advanced Specialization in Homoeopathy” need to have a bit larger font. Because these boxes are looking very empty with such small text. For eg: Years of Experience and Patients treated box and Book Consultation CTA box looks good and filled up well.
